#### Spanish Accents

In response to numerous requests by our friends of the Latin American Countries, we have endeavored to become a source of supply for the Spanish Printer.

Through the co-operation of our fine Spanish clientele, we have been able to formulate font schemes that would assure an adequate supply of accented characters in proportion to our standard fonts. In some cases it has proven advisable to cast only the lower case characters with Spanish Accents, due to the overhang on the capital character "N". Therefore, in order to eliminate breakage, both in shipping and on the press, we have found it advisable to supply only the capital "N" and a corresponding number of piece accents. This applies only to a few type faces and only in the 18 point and larger sizes.

The following shows the number of each accented and additional characters supplied in fonts of Spanish Accents:

| Point<br>Size | Ñ  | O  | á  | é   | í  | ú  | ú   | ũ  | ij | ü  |  |  |
